

Network, Server and Managed Services Technician Position.

IS THIS YOU?

ABADATA IS LOOKING FOR an experienced level 2 – 3 Network Technician to join our Great TEAM at Abadata. Does that describe you? Then give me a call Today! 989 883 3411

Abadata is a an SMB set in a unique and beautiful part of Michigan.

We are looking for a unique individual that has experience in networking and operating systems including Microsoft 2012+ servers. Experience in Linux, WatchGuard Firewalls, Cisco (firewalls, switches and routers) and other Networks appliances would be extremely useful. If you have experience in an ISP environment consider this a plus (however we are not an ISP). A+ and Network+ are considered as default certifications (or equivalent). You must have transportation which you are reimbursed (very well) for and a cell phone including text messaging capabilities. Obviously, with the above, discipline goes without a question.

We pay very well, offer bonuses, and after a trial period offer benefits.
